As per VDI guidelines 2198, this datasheet applies to standard electric tractor / platform truck only.

Dimensions are not binding and can be changed in any moment. The performances must be intended for brand new machines, after having completed the running-in tested in CESAB factory in normal climatic conditions.

Performances and weight are to be intended with standard motors and battery and with superelastic tires.

Some data can vary according to different equipments.

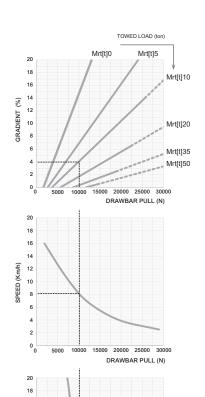

¹⁾ Loading surface capacity: 200 kg. 2) Performances and weight are intended with 930 Ah battery.
